

**I am up
for adoption**

**hello! 🐾
my name is**

WILLOW

age: 5.4 YEARS

sex: FEMALE

desexed: YES

**a little
about me**

- Willow is a snuggle bug that adores being around people and children (especially teenagers).
- She is calm, cuddly, playful, very affectionate, friendly and a happy girl.
- She walks well on lead, but does tire quickly and will happily go sleep for the rest of the day.
- Has been in a home where she is the perfect house guest. She will ask to be let outside to go to the toilet.
- Could easily be crate trained, as she wants to be with people and not outside.
- Would be fine with just inside/outside access also for full-time hours being left alone.
- Recommend an only dog home. Is still learning other breeds which can cause her to get strong on lead. But could live with a calm large doggy friend.
- Could live in an apartment, townhouse or in a small yard.
- Not pocket pet or cat friendly.
- Children 5+ years old.
